PRATHAMESH PAWAR

Ghansoli, Navi Mumbai | prathameshpawar645@gmail.com | 8433548784 | github.com/Prathamesh2603

SUMMARY

Passionate and detail-oriented Front-End Developer with a strong foundation in HTML5, CSS3, JavaScript, React, TailwindCss and hands-on experience building responsive, user-friendly web interfaces. Skilled at turning design concepts into interactive websites. Eager to contribute to dynamic projects that improve ux.

WORK EXPERIENCE

Graphic Design Intern
Nov 2024 - May 2025

riidl (Somaiya Vidyavihar University, Mumbai)

- Designed visual content such as posters, social media creatives, presentations, and event branding.
- Created engaging graphics aligned with riidl's brand identity and communication goals.
- Collaborated with teams to design materials for workshops, startup events, and innovation programs.
- Assisted in developing digital assets for marketing campaigns and outreach activities.
- Learned and applied design principles, typography, and layout techniques in real projects.

EDUCATION

Bachelor of Science in Computer Science (Honours)
Sep 2020 - Apr 2023

Somaiya Vidyavihar University, Mumbai

- CGPA: 6.98

Master of Science in Computer Science
Aug 2023 - May 2025

Somaiya Vidyavihar University, Mumbai

- CGPA: 7.30

SKILLS

Languages	Javascript (ES6+)
Tools/Frameworks	HTML5, CSS3, Javascript, Git, GitHub, Figma, React, TailwindCSS
Other Skills	Ui Design

PROJECTS

Sales Management System for Pizza Shop

Final Year Project (Bachelor's)

Developed a Sales Management System , the system streamlines order processing and customer management by identifying whether a customer is new or returning through their mobile number. For frequent customers, their details are automatically fetched from the database to speed up order entry. The application includes standard sales management features such as order tracking, billing, and sales history, providing an efficient and user-friendly solution for shop management.

Languages, Tools/Frameworks, Databases: C#, .Net Framework 4.5, SQL Server Management Studio

Medicine Recommendation System using Machine Learning

Final Year Project (Master's)

To recommend medicines based on symptoms provided by the user. User inputs symptoms.
The system predicts the disease using ML classification models. It then suggests medicines, precautions, diet, and workouts.

Languages, Tools/Frameworks, Algorithms: Python, Pandas, Scikit-learn, Flask, Bootstrap, Decision Tree, Random Forest, Naïve Bayes, SVM
