PROJECTS

Quick Show Movie Ticket Booking Website

Full Stack Movie Ticket Booking Website using MERN Stack. User can signup, explore the movies and book the tickets. While booking tickets, user can choose their preferred seats. Admin dashboard is also built, where admin can add new movies and manage the bookings. For creating user authentication Clerk is used, that allows integrate multiple signup options like Email signup, Social signup and Phone number signup. Added Inngest in this project to manage the Background Jobs and scheduling. Stripe is used to for payment gateway.

Frameworks, Databases: React, tailwindCSS, Node.js, Express, MongoDB, Stripe, Inngest, Clerk

Medicine Recommendation System using Machine Learning

Final Year Project (Master's)

To recommend medicines based on symptoms provided by the user. User inputs symptoms.
The system predicts the disease using ML classification models. It then suggests medicines, precautions, diet, and workouts.

Languages, Tools/Frameworks, Algorithms: Python, Pandas, Scikit-learn, Flask, Bootstrap, Decision Tree, Random Forest, Naïve Bayes, SVM
